

## Java script browser check

### Knowledge Bank 2007 Browser Compatibility Check

Check below that you meet the system requirements for the Knowledge Bank 2007 Online Conference. If there are any red crosses in the status section for an item, you may need to download the relevant software/plugin on the right hand side.

| Item                    | Status   | Download/Test   |
|-------------------------|--|---|
| Browser                 | ✓ You seem to be running <b>Mozilla</b> version <b>1.8.1.5</b>   |    |
| Java                    | ✓ You seem to have Java enabled. However, if you haven't already done so, be sure to go to <a href="http://Java.com">Java.com</a> and install the latest version.              |   |
| Shockwave<br>Flash      | ✓ You seem to have Flash installed. However, to be sure it meets our version requirements use the links on the right and install updates as needed.                            |  |
| Windows<br>Media Player | ✓ You seem to have Windows Media Player installed. However, be sure to verify it meets our requirements by viewing the sample file on the right and install updates as needed. |  |
| Cookies                 | ✓ You have cookies enabled   |   |
